Recommendations for Technology Purchases from ShopDOE

This guide to purchasing technology from ShopDOE was created by The Jewish Education Project in collaboration with Baruch Noy, an edtech consultant. You can reach out to Baruch Noy for technology support and coaching, all at no cost to you!

rabbinoy@gmail.com

This document covers major categories of hardware needed by schools, supplied by vendors with DOE contracts and available for schools to purchase with Title funds from the ShopDOE website. Some contracts are only available at specific times, and the availability of items can fluctuate. For free guidance on effectively using available funds, contact Shay Cohen. scohen@jewishedproject.org

Interactive Flat Panel

SSBA for NPS only has a contract with Newline, which makes it very likely that NPS already have Newline boards, and allows for a uniform experience.

Standard Classroom Size:

Desktop Computers

Desktop computers come enrolled in Intune. The DOE will grant access to an instance of Intune management for the NPS by request. Some NPS have had success imaging the device in place of the DOE image.

Chromebooks Devices

Chromebook devices have a 3-year accidental warranty through DOE, and include a Google Management License. Devices are enrolled in the DOE Domain, so schools can only set User settings, not Device settings (except for limiting to domain login, etc. which the DOE will set up by request). DOE devices come with testing Kiosks (state testing, AP exams, etc.) set up already.
